

ViscoLine™ Monotube Unit

The tubular heat exchanger series from Alfa Laval

ViscoLine Monotube

Applications

The ViscoLine™ Monotube unit is a tube-in-tube heat exchanger. The Monotube is especially used for grape mash, diced tomato, diced vegetable and diced fruits and also sauces and soups that contain particles. Can also be used for the heating, cooling and pasteurization of products with low and average viscosity that contains fibres, particles.

Standard design

The ViscoLine Monotube heat exchanger consists of a single tube mounted inside an outer shell tube. The product medium flows inside this tube, and the service medium around it. It is a fully welded construction with a bellow on shell tube to absorb thermal expansion. ViscoLine Monotube modules are normally connected in series and mounted on support frame or full frame.

Working principles

The product medium inside the tube flows in counter current to the service medium. The product tube is corrugated or it can be smooth. The shell tube is always corrugated. The installation is maintenance free, thus eliminating any need for spare parts.

Standard materials

Product side (tubes)	Stainless steel AISI 316
Service side (shell)	Stainless steel AISI 304 or AISI 316L (optional)
Frame	Stainless steel AISI 304 (units can be angled for self-draining on request)

Other materials are available on request.

Technical data

Mechanical design pressure

The ViscoLine Monotube unit was designed for a pressure of 15 barg (217 psig) on the product side (tube) and 10 barg (145 psig) on the service side (shell), depending on the connection. The unit can, however, accommodate higher pressure ratings, depending on component thickness and connection type.

The ViscoLine Monotube unit complies with the European Pressure Equipment Directive (PED), and is entitled to bear the CE mark, though depending on the design of the connections.

It is designed to operate at a temperature of 160°C (320°F). All units are provided with an expansion joint to absorb any thermal expansion stresses that arise.

Connections

Product side (tubes)	SMS
	DIN 11851
	Tri-Clamp
	Flange
Service side (shell)	SMS
	DIN 11851
	Tri-Clamp
	Flange

Options

Protection sheets
Insulation
Shell in steel grade AISI 316L
Other pressure and temperature ratings on request

ViscoLine VLO as single tube

ViscoLine VLO on a full frame

Designation

VLO 51/76-6-316L/304-C

VLO: ViscoLine Monotube

51: outer diameter of product tube

76: outer diameter of service shell

6: module length (m)

316L: material product side (tube)

304: material service side (shell)

C: corrugated inner tube

S: smooth inner tube

All types are also available in 3 meter length

Type	Volume in product tube		Heat transfer area	
	litres	gallons	m ²	ft ²
