### Display divisor

The indication of the measured value on the display can be influenced by means of the divisor (divider). The divisor shifts figures of the measured value into the invisible sector of the display unit. Although the figures are not displayed, they are also calculated by the electronics unit and mathematically rounded.

### Calculation of value displayed (example: order text):

Measured value per revolution 25324  
Display divisor 1000

Feature	Value displayed	Measured value
1 <sup>st</sup> revolution	25	25324
2 <sup>nd</sup> revolution	51	50648
3 <sup>rd</sup> revolution	76	75972
