

## OFF ROAD SAE 10W/40

### DESCRIPTION:

OFF ROAD is a synthetic super multigrade oil developed to meet the lubrication needs of the last generation motorcycles with 4-stroke engines.

OFF ROAD ensures optimum engine lubrication even at high running temperatures.

OFFROAD keeps the engine and the sparkplugs clean to offer highest efficiency and performance.

OFF ROAD protects the engine from wear, prolonging the life of the moving parts; in particular the special extreme-pressure additives guarantee protection of the gears in the engine.

OFF ROAD, thanks to the special formulation, allows easy starting even in very cold weather as well as reduced fuel consumption.

OFF ROAD ensures perfect oil-bath clutch operation under any condition and duty, avoiding problems of

clutch slip.

### APPLICATIONS:

OFF ROAD is a oil developed to meet the lubrication needs of the last generation motorcycles with 4-stroke engines.

### SPECIFICATIONS – HOMOLOGATIONS:

API SJ; JASO MA-2
